

## OAYS YOUTH SERVICE AGENCY DATA PROFILE BY COUNTY AND CATCHMENT AREA

The goal of this effort is to present each agency with pertinent information and descriptive data of their Catchment Area. Statewide data is also provided to enable comparison by category of your agency and the state totals. Whenever possible a description or link will be posted for the source of the data depicted on the OAYS .org web site.

This information will be helpful when completing grant applications, completing a comprehensive agency needs assessment and for future request for applications for funding. Please review the data and let the office know if there are any errors or if you identify other categories of information that would be helpful to your agency.

Information and data collected are in the following categories (to activate a link, hold down the control key and click your mouse on the Link):

2015 Total population and 0-18 population – Kids Count Data Center – [Link](#)
