

Canoe Problem

You are in a canoe, lost and alone, floating down a river. In the canoe with you, you have the following items:

1. \$200.00 in cash
2. 12 cans of milk
3. A fishing pole
4. A first aid kit
5. Short wave radio with weak batteries
6. A life jacket
7. A box of flares
8. A blanket
9. A bucket and rope

There is no one around for miles. The canoe is riding low in the water and you must lighten your load. You must throw overboard everything except two items on the list.
